

Downloading Microsoft Office for students

Students are now able to download the full version of Microsoft Office for PC or Mac free of charge with their C2k username **for installation on personal and home computers. The free download should not be installed on C2k Managed portable devices**

There are two options available:

Option 1 – for pupils who have not been given access to C2k email. Please follow instruction in [EN086](#)

Option 2 - for pupils who have been given access to C2k email by the school as per [EN089](#)

Student Downloading Instructions

From the computer you wish to install Microsoft Office on, log in to MySchool

(www.c2kschools.net) and click ! OneDrive icon:

This opens the Office 365 home page where the install link appears below the Office Online buttons. Click **Install** to start the process.

From the Install page, the appropriate version of Office should be selected before clicking the **Install** button.

The screenshot shows a web browser window displaying the Office 365 installation page. The address bar shows the URL <https://portal.office.com/OLS/MySoftware.aspx>. The page header includes the Office 365 logo and navigation links for Outlook, Calendar, People, OneDrive, and Tasks. The main content area is titled "Software" and "Office". It instructs the user to "Install the latest version of Office" and lists the apps that will be installed: Word, Excel, PowerPoint, OneNote, Access, Publisher, Outlook, Lync, and InfoPath. Below this, there are dropdown menus for "Language" (set to English (United States)) and "Version" (set to 32-bit (Recommended) Advanced). A note states: "Note: Installing additional languages on a computer that already has this version of Office doesn't count against your install limit (5)." There are links for "Review system requirements" and "Troubleshoot installation". An "Install" button is visible. At the bottom, there are links for "Not ready to install the latest version of Office?", "Install Office Professional Plus 2010", and "Install Office Professional Plus 2010 language packs".

This downloads a small installer file. Select **Run** to continue.

Once installed, the installation of the full Office suite will start. Please note, this is a large file (3Gb) and as such installation can take some time.

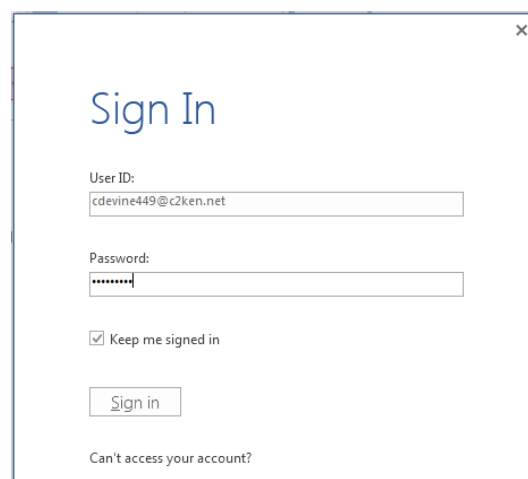

When prompted to activate the software, pupils should enter their username in the format:

<username>@c2ken.net

Please note this requires the domain **@c2ken.net** and NOT @c2kni.net.

To complete installation, a student will be asked to sign in. Again, the format is <username>@c2ken.net and the password is a student's normal C2k password.

Notes:

1. The installation of Office will remain available while a student's C2k username remains active. i.e. When a student leaves school, their C2k username will cease to be valid and the Office product will revert to a read-only version.
2. Each user can install Office on up to 5 devices. These can be a combination of PC and Mac.
3. If a user installs Office on a 6th device, the software will remain as read-only until one of the previous 5 installations is deactivated. To deactivate an installation, go to the Office 365 **settings** page and select **Software – Install and manage software** and then follow the instructions.
4. Access to mobile applications has not yet been enabled. These will become available early in 2015
